JHOAN CARRERO

Software Developer

Computer professional, lover of technology and music, with knowledge of networks, physics and mathematics.

WORKING EXPERIENCE (FREELANCER)

Cabaña's Gestor (Project, 2016)

Project programmed in C ++ with the use of the object-oriented programming paradigm, in charge of managing the inventory of a sportswear store (First Project).

Blest Salon (Project, 2018)

Project programmed in Python with the use of queries to a database, MySQL in charge of distributing waiters to their tables in a restaurant (currently designing its Web version, with Javascript frameworks, specifically ReactJS).

CaptiveFire (Project, Actualmente)

Project based on a network firewall (OpenWrt) to redirect all web traffic to a captive portal, using the controller view model, with ReactJS technologies on the frontend side, PHP on the backend side and an Nginx server (www.captivefire.net) .
